REVIEWER INDEX

to Volume 98, May–August 1981

Below is a list of the people who reviewed manuscripts for GENETICS during the preparation of Volume 98.

The aim of GENTICS is to communicate significant research. To succeed, we must recognize what is significant; we must make sure the presentation is accurate, unambiguous and yet readable. For this we depend heavily on our reviewers, who perform this indispensable service without reward. The quality of the journal can be no better than the quality of their efforts. We apologize to any reviewer whose name has been inadvertently omitted, and we are sincerely grateful to all.
